Vetoed for Special Purpose.

For several years the sentiment in the State has been demanding that the number of jurors which a defendant in a criminal case may excuse should be reduced from fifteen to ten or some other number below fifteen. This sentiment was given expression in a very strong paper read by Col. John R. Allen, of Lexington, before the State Bar Association at its session at Win-

The Legislature that has just adjourned passed such a bill reducing these challenges from fifteen to ten, but when the bill reached Governor Willson he killed it by veto. The same Legislature passed a bill providing that when a witness has once testified and his testimony has been preserved and nor the United States feels any need of the witness has died, the testimony given by him before he died may be read on a subsequent trial of the case.

These both seem to be good measures, but were both vetoed by Gov. Willson and in his veto he suggests that they were passed for a special

A great many people believe that he vetoed them for a special purpose, and that if Caleb Power was not again to be tried Gov. Willson would not have found these bills objectionable.

Baseball Trust.

Between 5,000,000 and 6,000,000 "official" baseballs are used yearly on the American diamonds. The declared advance of 25 cents on each ball this year means, therefore, more than \$1,250,000 increase to the handlers. The first baseball factory was started in 1858. It may be then that the manufacturers intend the fresh profit as a slight golden-jubilee token to themselves.

Mr. Williams asserted that there are many Republicans living in tariff revision district who want tariff revision. but declared they do not want it refused by being told to "Go to Father."

An investigation has been made by Herbert Knox Smith, Commissioner of Corporations in the Federal Department of Commerce and Labor, of the bills which have been introduced in Congress aimed at the prevention of dealing in farm products for future delivery, and he has decided unofficially that these "features" are neither prenicious nor harmful to the community. As a matter of fact evrey merchant in the country is dealing in futures all the time. Frequently the government makes contracts for sup-plies with merchants who have not the goods on hand and who must arrange to get possession of them before they can deliver them. The principle is exactly the same as obtains in the cotton and grain exchanges of New York and Chicago. The operator at Chicago, for example, agrees to deliver a certain quantity of grain within a specified time. He has no grain in his possession. It is growing. When the time arrives for delivery he must observe his agreement, and he exchange sees to it that delivery is made. Future needs for consumption made. Future needs for consumption are thus provided for without glutting market after harvest. The agrarian party of Germany believed the effect of prohibition of futures would be to make prices for grain more stable. It has had a directly contrary effect. In some of our lown Southern States the "anti-future" laws have stopped the dissemination of quotations. The farmer consquently is unable to obtain any information, and large operators who get quotations through their agents cotton or wheat at prices lower than those ruling on

New Dean in Law.

It has been announced that Judge W. T. Lafferty, of Cynthiana, will be made dean of the law department which will be established at the State University. The establishment of the law department was one of the developments contemplated when Kentucky State College was recently made a university. It is undertsood that at the meeting of the board of trustees, called for April 14 in Lexington, steps will be taken to complete the details for establishing the law department and that Judge Lafferty will be elected dean of the faculty and will assume the duties in June. It is also reported that in addition to his position as dean of the law department Judge Lafferty will elected financial trustee he will have supervision of the funds. Judge Lafferty has been for a num-ber of years a trustee of State College and has practiced law for twenty-eight years. He has been County Attorney, County Judge and representative in the Legislature from Harrison.

Whole World Kin."

When a rooster finds a big fat worm he calls all the hens in the farm yard to come and share it. A similar trait of human nature is to be observed when a man discovers something exceptionally good — he wants all his friends and neighbors to share the benefits of his discovery, This is the touch of nature that makes the whole world kin. This explains why people who have been cured by Chamberlain's Cough Remedy write letters to the manufacturers for publication, that others similarly ailing may also use it and obtain relief. Behind every one of these letters is a warm hearted wish of the writer to be of use to someone else. This remedy is for sale by W. T. Brooks. You need no other guaran-

Hinton's Refrigerator's Save their Cost in Ice

and Doctor's Bills Within One Year

If you want just a Refrigerator without caring for quality, we may not interest you in what we have to say. The outsides of all Refrigerators are more or less alike. The kind of filling between the walls is what counts. You buy ice every day, but a REFRIGERATOR you need only buy once, if you buy a good one. The one best material for inside insulation is granulated corks. Consult any authority.

THE NORTH STAR

Is the only one on the market made with this material. No odor can generate in a North Star. It produces dry cold air, which is the best food preservative. Granulated cork saves from 10 to 20 per cent. on your ice bill, These

things we can prove to your satisfaction. Our big line of Refrigerators includes the Tile, White Enamel, Opal Glass and Galvanized Steel interior. Any size for any sp ae., and every one guaranteed. If you buy your Refrigerator here you know that it is not second-hand.

Wiggins is a horse of attractive conformation, 153 hands high, full of quality, and with fine feet and legs. In disposition and manners he is perfect. His colts are uniformly good colors and inherit his bold, frictionless way of going. They are generally pure gaited and trot with light shoes and few boots. Wiggins himself wore a 7-ounce shoe with no boots in front. He was foaled a trotter, and as a yearling trotted a mile over a three-quarter mile track in 2.331/4. He took his record when two years old and quarter mile track in 2.33¼. He took his record when two years old and won five straight stake races and \$4,600 that season. Douglas Thomas, his trainer, says he could have trotted a mile over a good track in 2.12. His colts not only trot fast young, but sell for high prices. He was himself a bold finisher and his colts are like him in this respect. For an out-cross for in-bred mares you can't do better than to breed to Wiggins, though he nicks well with mares of any breeding. No other stallion at the same age has ever accomplished more than Wiggins. No other stallion of any age ever had three two-year-olds to beat 2.18 trotting in one year. No other coughs and colts and haler of weak, sore large and for stallion ever had saven trotters in 22 0 list at ten years. stallion ever had seven trotters in 22.0 list at ten years. Great Army Plans.

By direction of the President, the Special Army Board, of which Briga-dier General Wetherspoon, President of the War College, is President, has been appointed to draw up plans for a general reorganization of the army on modern progressive lines, calling for the authorized increased strength for 65,000 officers and men to 100,000 officers and men in the regular army.

The plans will also call for a closer relationship between the organized militia and the Regular Army looking to a quicker mobilization of these two

Important Decision.

That the Kentucky statutes imposing a tax on distilled spirits in bondwarehouses does not violate the Federal Constitutionl was asserted by the Supreme Court of the United States in a decision handed down yesterday by Justice McKenna in the case of J. B. Thompson vs. the Commonwealth of Kentucky.

Sensational Charge to Grand Jury

Circuit Judge Stout in his charge to the grand jury at Frankfort did not directly mention the recent Senatorial race, but he said the crime of vote selling was a most henious one in any form, but especially was it contemptible when a man elected to the Legislature by his constituents "comes to the State Capital and fails to carry out the wishes of his people, or, in other words, sells out."

He said it was a matter of common rumor that lobbyists had bought votes for and against certain measures and he told the grand jury that it was their duty to investigate the matter fully both as to who sold out their constituents and those who did the buying. It is understood that all the newspaper reporters who served here during the legislative session will be summoned to tell where they heard the bribery rumors that were so frequently pub-

HERE'S IDEAL MODEL CITIZEN.

The Coming Man as Seen by Admirers of Socialism.

To describe an ideal modern cit-

zen now is at best to make a guest and a suggestion as to what must be built in reality by the efforts of a thousand minds. But he will be a very different creature from that indifferent, well-behaved business man who passes for a good citizen to-day. He will be neither under the slave tradition nor a rebel, nor a vehement elemental man. Essentially he will be aristocratic; aristocratic not in the sense that he has slaves or class inferiors, because probably he will have nothing of the sort, but aristocratic in the sense that he will feel that the state belongs to him and he to the state. He will probably be a public servant; at any rate he will be a man doing some work in the complicated machinery of the modern community for a salary and not for speculative gain. Typically he will be a professional man. I do not think the ideal modern citizen can be a person living chiefly by buying for as little as he can give and selling for as much as he can get; indeed, most of what we idolize as business enterprise, I think he will regard with very considerable contempt. But then I am a Socialist and look forward to the time when the economic machinery of the community will not be a field for private enrichment but for public service .-Everybody's Magazine.

Rapid changes of temperature are hard on the toughest constitution.

The conductor passing from the heated inside of a trolley car to the icy temperature of the platform—the canvasser spending an hour or so in a heated building and then walking against a biting wind-know the difficulty of avoiding cold.

Scott's Emulsion strengthens the body so that it can better withstand the danger of cold from changes of temperature.
